SECURECHOICE SCORPION ASSURANCE PROGRAM

With the proven performance of Demand® CS insecticide with iCAP™ technology, Syngenta is committed to providing effective scorpion control solutions. By following the treatment protocol specified, Pest Management Professionals (PMPs) can help reduce scorpion populations around customers’ homes or properties.

Using Advion® insect granule helps control scorpion food sources, such as crickets, cockroaches and earwigs, in areas where insecticide sprays may not be effective. When used together, treatments of Demand CS and Advion insect granule provide a more thorough and effective scorpion eradication.

Assurance Offer: If applications of Demand CS and Advion insect granule fail to provide adequate reduction of scorpion populations during the specified treatment period, Syngenta will provide the appropriate quantity of Demand CS and/or Advion insect granule to cover the retreatment(s) as described in this SecureChoiceSM Scorpion Assurance Program.

To qualify for the SecureChoice Scorpion Assurance Program, Demand CS and Advion insect granule must be applied according to the treatment protocol.

Program Details

Make one application of Demand CS, followed by one application of Advion insect granule, at the below application rates on or about every 90 days per account.

Program Terms and Conditions

▶ PMP will follow all label guidelines, recommendations, use rates and treatment protocols as defined in the SecureChoice Scorpion Assurance Program.
▶ PMP will review all program materials with a Syngenta representative or authorized distributor representative prior to PMP participation in the SecureChoice Scorpion Assurance Program.
▶ PMP will agree to provide the following information in the event that a retreatment or retreatments are necessary:
  ▶ The amount of finished gallons and pounds of products per treatment, per account
  ▶ The approximate area treated (acres or sq. ft.) per treatment, per account
▶ PMP will agree to work closely with Syngenta territory manager to perform the requirements in the SecureChoice Scorpion Assurance Program during the Program Period.
▶ Some homes or properties may not be ideal candidates for receiving scorpion treatments. Please consider this when discussing scorpion treatment options with customers in this situation.
▶ If PMP receives a complaint from an account that requires a retreatment within this SecureChoice Scorpion Assurance Program, despite following all label instructions and conditions within this SecureChoice Scorpion Assurance Program, PMP must contact a Syngenta territory manager within 7 days of the account being retreated.
▶ If Syngenta determines that the retreatment(s) is/are justified, Syngenta will provide the quantity of Demand CS and Advion insect granule to cover the retreatment(s) of the account as needed. Syngenta will not pay for the application or other costs associated with retreatment(s).
▶ Syngenta reserves the right to investigate each product performance complaint, to verify all purchases or modify or discontinue this SecureChoice Scorpion Assurance Program at any time.

Treatment Protocol for Scorpions

For Demand CS applications using backpack, hand pump or power sprayer:
▶ Treat potential scorpion harborage sites, such as garages and attics, as well as materials outside of buildings such as stacked bricks or stones, mulch and leaves.
▶ Treat areas where scorpions wait for prey, such as the bottom of exterior stucco walls near weep seals or utility penetrations.

For Advion insect granule applications using hand-held rotary spreader or shaker bottle (such as the 4-pound bottle of Advion insect granule):
▶ Treat landscaping adjacent to the structure covered with gravel, mulch or ground cover.
