

Best-in-class protection on the broadest range of diseases

With a convenient, pre-mixed formulation, Vibrance® Quattro seed treatment combines four fungicides to protect cereal crops against a broad range of seed- and soil-borne diseases.

Vibrance Quattro provides the following benefits:

- Four systemic fungicides provide extensive disease protection, including *Fusarium graminearum*
- Protects against smuts in cereals, including true loose smut in barley
- The Rooting Power™ of Vibrance delivers stronger roots that take full advantage of soil nutrients and can better defend against soil diseases
- One use rate for all crops (mL/kg of seed)
- No closed system required for on-farm use

For use on:

- Barley • Spring wheat • Durum • Winter wheat • Oats • Rye • Triticale

Evaluation of control of seed-borne *Fusarium graminearum*

Raxil® PRO

2 replications, 10 sub reps - 325 mL per 100 kg seed. Syngenta Honeywood Research Facility, 2015

*23% *Fusarium graminearum* and 19% *Fusarium* spp. infection was used for demonstration purposes. Syngenta does not recommend use of seed with these infection levels.

Performance evaluations are based on field observations and Syngenta field trial data over a limited geography and time. Data from multiple years should be consulted whenever possible. Individual results may vary depending on local growing, soil and weather conditions.

Oats	325	50.1	20.0	200	2294	8,978

*Vibrance Quattro cases contain 2 x 10 L jugs.

Insect Control

For insect control in addition to the best-in-class disease protection provided by Vibrance Quattro, consider Cruiser® Vibrance Quattro seed treatment. This all-in-one Seedcare solution includes a powerful seed-applied insecticide for in-season wireworm control.

Alternatively, Vibrance Quattro may also be tank-mixed with Cruiser 5FS seed treatment. This tank-mix option is only valid for those crops common to the registered labels of Vibrance Quattro and Cruiser 5FS seed treatment insecticides. Consult each product label for registered use rates and follow all label use instructions. Read the label directions for each product and follow the most restrictive label precautions and limitations.
